

Portable Humidifier dry fog Air Atomizing Nozzles

The main components of the mini fogger systems:

Tank, nozzles, Valves, Pressure regulator etc.

The features of mini fogger:

- 1, Each mini fogger spray can reach a distance of 5-6 meters
- 2, Each mini fogger can meet the demand of humidifying or cooling for a space of 100 m²
- 3, It's of a structure with 2 grades of air and liquid atomizing, which produce finest droplets.

The droplets can float in the air without wetting the ground.

- 4, It is not easy to come to a blocking.
- 5, It's easy to install, and the humidifying area can be evenly covered

Nozzle numbers:	Air pressure under 3Mpa	
	Spray Volume L/h	Air consumption N. L/m
1 nozzle	2.4	29
2 nozzle	4.8	58
3 nozzle	7.2	87
4 nozzle	9.6	116

Portable Humidifier dry fog Air Atomizing Nozzles have the following features:

- Portable Humidifier dry fog Air Atomizing Nozzles' spraying can reach distance of 5-6 meters
- Can meet the requirement of humidifying or cooling for a space of 100 square meters
- The fog produced by the portable humidifier dry fog air atomizing nozzles can float in the air without wetting the ground
- The spray is finely atomized , mist or fog spray and not easy to come to clog
- Portable Humidifier dry fog Air Atomizing Nozzles are easy to install and the humidifying area can be evenly covered
- Air pressure is usually 2 -3 bar.

• General Application :

Coating, cooling, humidifying

Gas cooling

Lubricating, moistening

Misting, fogging

Dust suppression

HM-4 Installation
